3a. Create a pdf document that explains whether or not the PlayerInfo is in BCNF.

- ➔ PlayerInfo table is not BCNF.
- ➔ Table is 1NF because it has single valued attributes.
- ➔ In table, there are two information, one is of player info and other is team info so some info is dependent on other.
- ➔ jerseyNo is determinant but not a candidate key.
- ➔ So, jerseyNo is not candidate key because first name and last name is dependent on that.
